### Profile

Enthusiastic Frontend Developer with a knack for creating engaging web applications. I am proficient in HTML, CSS, and JavaScript, especially with React, I love turning ideas into intuitive user experiences. With a solid backend foundation in Node.js, I ensure seamless integration and smooth functionality. I am a team player who values collaboration and is always eager to learn the latest trends to deliver innovative solutions that delight users.

### Professional Experience

#### Frontend Developer, XisLabs [🔗](#)

February 2023 – present | Lahore, Pakistan

- Develop modular, reusable code components to streamline development and maintenance.
- Ensure prototypes accurately reflect the final product's functionality and user experience.
- Collaborate with the team to ensure smooth integration between frontend and backend components.
- Develop, test, and deploy new features iteratively, ensuring adherence to project timelines and quality standards.
- Contribute to sprint planning, stand-ups, and retrospectives.
- Work on backend development to create and integrate APIs using Node.js, ensuring seamless data flow between frontend and backend.

#### Frontend Developer Intern, XisLabs [🔗](#)

December 2023 – February 2023 | Lahore, Pakistan

- Transformed Figma designs into responsive, functional web pages, ensuring a seamless user experience across devices.
- Integrated RESTful APIs to connect frontend applications with backend services, enabling dynamic content updates and user interactions.
- Contributed to team meetings and code reviews, gaining valuable feedback and insights into best practices.
- Utilized version control systems like Git to manage code changes and collaborate effectively within the team.
- Consistently met project deadlines while maintaining high-quality standards, contributing to the timely delivery of features.

### Education

#### Bachelors in Computer Science,

*Virtual University of Pakistan*

April 2022 – April 2026 | Lahore, Pakistan

GPA 3.57 / 4

### Personal Project
